PINE SOLID WOOD BOX TATAMI BED

Pine wood has a natural light color and fine grain. It adds a natural and airy feel to interiors.

PINE SOLID WOOD BOX TATAMI BED

Pinewood-

Despite its light color, pine wood adds a touch of warmth to interiors.

The warm tones create a cozy, welcoming environment, perfect for making a space feel homely and inviting.

Its natural appearance allows it to blend seamlessly with various interior elements, including textiles, colors, and other materials, creating a cohesive and harmonious design.

Tatami Box:

A tatami box, traditionally used in Japanese homes, is a storage container designed to fit seamlessly with tatami mats. These mats are woven straw mats used as flooring in Japanese-style rooms.

PINE WOOD

Pine resists shrinking and swelling and develops a charming, rustic pattern with age and use. Pine is a softwood, making it susceptible to dents and bending. Urthermore, pine wood is known for **its durability**. Despite being a softwood, pine is surprisingly resilient and can withstand daily wear and tear with ease.
